PROFESSIONAL PROFILE

Motivated Information Technology graduate currently completing an Advanced Diploma in Information Technology at the Vaal University of Technology, following completion of a Diploma in Information Technology. Bringing practical exposure to software development, web technologies, databases, DevOps, cloud deployment, APIs, networking and data analysis through academic and independent technology projects. Demonstrates strong problem-solving, analytical thinking, adaptability and a willingness to learn new technologies. Eager to contribute to real-world technology and business initiatives while developing technical, professional and leadership capabilities within a high-performing graduate environment.

CORE COMPETENCIES

- Software Development
- Web Application Development
- Problem Solving & Analytical Thinking
- DevOps & CI/CD
- Cloud Deployment
- Database Development & SQL
- Data Analysis & Machine Learning
- API Integration
- Software Testing & Debugging
- Version Control
- Networking Fundamentals
- Technical Troubleshooting

EDUCATION

- **Advanced Diploma in Information Technology | Vaal University of Technology (VUT)**
  Expected: 2026
- **Diploma in Information Technology** | 2025
- **Grade 12/NSC| Flavius Mareka Secondary School** | 2022

TECHNICAL SKILLS

- **Programming:** Java, Python, JavaScript, PHP, SQL
- **Web Development:** HTML, CSS, Node.js, Next.js, WordPress, Elementor
- **DevOps & Version Control:** Git, GitHub, GitHub Actions, Jenkins, Docker, CI/CD Pipelines
- **Databases:** SQL, PL/SQL, Database Design and Management
- **Cloud & APIs:** Cloudflare, REST APIs, Resend API
- **Data & Machine Learning:** Python, Pandas, NumPy, Matplotlib, Scikit-learn
- **Networking & Systems:** CCNA, Networking Fundamentals, Windows
- **Software Engineering:** SDLC, Debugging, Software Testing

TECHNICAL PROJECTS

- **Vindmy – Connection Platform**
  Technologies: HTML, CSS, JavaScript, Node.js, Resend API, Cloudflare, Git
  Developed a privacy-focused platform enabling motorists to communicate using vehicle registration numbers. Built responsive interfaces, integrated secure forms, managed cloud deployment, and implemented email functionality using the Resend API
- **Student Grade Calculator – DevOps Project**
  Technologies: Java, GitHub Actions, Jenkins, Docker
  Built a Java application and automated testing and deployment using CI/CD pipelines with GitHub Actions, Jenkins, and Docker.
- **RetailCast – AI Retail Prediction System**
  Technologies: Python, SQL, Pandas, NumPy, Matplotlib, Scikit-learn
  Developed a retail prediction system for stock, sales, and demand forecasting using Python, SQL, Pandas, NumPy, Matplotlib, and Scikit-learn, applying data analysis and machine learning techniques.
- **Dibata Security Company Website**
  Technologies: WordPress, Elementor
  Designed and customized a responsive corporate website, including service pages, galleries, plugin configuration, and content management.

CERTIFICATIONS & ACHIEVEMENTS

- **FNB App of the Year 2025 – Full Stack Development**
- **Cisco Certified Network Associate (CCNA)**
